Instructions for home printing

One of the most convenient and quick options is to print your PDF from home.

1. Save the PDF file onto your computer.
2. Open the PDF file in Adobe Acrobat Reader. If you do not already have this program, you can download it for free at <https://get.adobe.com/reader> Using other programs may alter the design and colors.
3. Check what the maximum paper thickness is for your printer model. Be aware, paper that's too thick could jam and damage print heads.
4. Visit a paper store or office supply store to view and purchase your 8.5" x 11" or A4 cardstock.
5. In your print settings make sure in the 'Size Options' section 'Actual size' is selected. Make sure to set your print settings with the correct paper type and the correct quality mode. Colors tend to vary depending on your monitor, printer and cardstock.
6. If there is a backside to your printable, print 1 side first, then put the printed page back into your printer to print the other side next.
7. If needed, trim your printables with an X-acto knife or use a paper cutter for best results. Scissors can also work. If you have a large quantity to trim, many local copy shops have paper cutters or offer affordable bulk cutting rates.

Instructions for printing at an (online) print shop

If you do not have a home printer or you need to print a large quantity, (online) print shops can be the most cost effective option. They provide many paper options, cutting and their printing quality can be a lot nicer than a home printer. You can either visit a print shop or you can upload your file directly online to some of the bigger print shops (such as Office Max, FedEx Office, Staples).
